Tennis Reservation/Play Rules & Procedures

- During periods where demand for courts exceeds the supply a resident should play only once during primetime which is 8:30 a.m. to 1:00 p.m. on weekends and holidays.
- One court reservation per unit per day. The resident holding the reservation must play in the game.

If you are planning to play twice with the same foursome, please plan your reservations for 1 p.m. and after. Playing in prime time, and rolling over afterwards, is not fair to others trying to reserve courts.

- A resident may reserve a second court for play beginning at 1 o'clock provided it is not a holiday weekend and courts are available. The second reservation can be made only on the day of play.
- Players are asked to give at least 48 hours notice of court cancellation to allow those on the wait list to form games. The 24 hour notice will be in effect for penalty if the court is not used.
- Players who do not have a court or a game and wish to play, please call the West Lodge and put your name on the *Want to Play List for the day/weekend you wish to play.
- Court reservations schedule will be posted on the West Lodge bulletin board on Friday.

Thank you,
Tennis Committee &
Debbie Bombard, Recreation Manager

***The Want to Play List** is an amenity to match players looking for a game and players looking to complete a game.. In the interest of fairness are residents are asked to consult the Want to Play list to give players without a game an opportunity to play.

Please be courteous.... When a tennis game, yoga, hydro-fit, etc. are in progress, please do not interrupt the activity.

Thank you for your cooperation.

Keep your eye on the Link for information on Camp Lakeridge and the Lakeridge Stable Horse, Farm and Outdoor Adventure Camp.

Winter/Fireplace Safety Tips

Dear Homeowner:

Before you use your fireplace, remember that your fireplace is not designed to heat your unit. Please, use caution when burning in your fireplace. Short of not burning all, remember to implement these important precautions:

- **Lakeridge fireplaces are not constructed for heating the entire unit.**
- Do not overload with large logs or over heat your fireplace for long periods of time. We recommend only about three medium sized logs at a time.
- Always check to make sure the damper is **OPEN** before starting any fires.
- Never leave a burning fire unattended.
- Always use a metal, mesh screen in front of your fireplace. Leave glass doors of a fireplace open while burning a fire - unless fireplace manufacturers' instructions indicate otherwise.
- Use seasoned woods only.
- If burning commercially made fire logs make sure to follow the manufactures' instructions. Many of them allow for only one log at a time to be burned with no other flammables.
- Never burn cardboard boxes, wrapping paper, or garbage that can spark and cause a chimney fire.
- Do not burn materials such as plastic, charcoal, or Styrofoam, which produce toxic gases.
- When starting fires, do not use any flammable liquids such as gasoline, kerosene, fuel oil, or lighter fluid.
- Keep a glass or metal screen in front of the fireplace opening to prevent embers or sparks from jumping out.
- Remove any flammable materials such as furniture, paper, toys, and matches from the front of the fireplace opening.
- Never close your damper with hot ashes still burning in the fireplace. After you are sure that the fire is out, close the damper to prevent heat loss within your unit.
- Make sure not to dispose of burning ashes in any storage sheds or trash bins. If they are still warm the may rekindle and start a fire.

Outdoor Hoses

Remember to disconnect your garden hose from your outside faucet during the colder freezing months in order to allow the hose bib to drain. Failure to do so during freezing temperatures may result in a burst water pipe.

Keep Garage Doors Closed

Keep garage doors closed at all times to keep water pipes which may be located within the walls from freezing (attached garages). Also, keeping garage doors closed will shut out wildlife looking for warm places.

Important note:

Even though you may have your unit winterized when you leave your unit for the winter, you might still have pipe breakage, if you don't set your unit heating thermostats at a minimum setting to maintain 50F-55F including the crawl space heater(s) if there is any. Keep in your mind that winterization does not prevent the pipe breakage 100% during the winter just because you turned the water off and drained the water line. The key is that the heat must be maintained between 50F and 55F. Therefore, it is much more critical to leave the heat on than turn the water off in your unit if you leave your unit for a certain time during the winter.
